ULTRA LIGHT FOLDING WHEELCHAIRS

EXELLE family

TEKNA ADVANCE family

YOGA

EGO family

■ four different folding systems

EXELLE

The first wheelchair born from PROGEO that has always renewed itself in its look while constantly improving its manoeuvrability, lightness and reliability characteristics.

Exelle offers several frame configurations and a wide range of colours and accessories for a complete personalisation.

STANDARD
REAR FRAME

DYNAMIC 2.0
REAR FRAME

TITANIUM FRAME

FRAME

Two frame angles and two frame lengths are independent from the seat depth and they allow for a more suitable configuration of the wheelchair to the user.

TEFLON BUCKLE

SPACE-SAVING

the curved crossbar allows for an extremely compact closure of the wheelchair.

(min. encumbrance 26 cm)

RELIABILITY

teflon buckles separate the inner connection tubes from the front and rear frame tubes; that eliminates noises and plays for long time while enhancing the wheelchair's stability.

EXELLE VARIO

The main characteristics of the model Exelle, but even more versatile with its easy-to-use swing in/out and removable footplates.

SWING-AWAY FOOTPLATES

Internal/external

COMPACT

very compact when removing or swing the footplates away: it helps for transfers.

PRACTICAL

easy-to-use release lever with sideward movement.

ADAPTATION

three front frame angles and three frame lengths are independent from the seat depth and they allow for a more suitable configuration of the wheelchair to the user.

EXELLE JUNIOR

The Exelle for the child.
Abducted front frame with
wide ample adjustment for
the footplate and for the
front height with no need
to replace any parts.

FRAME LENGTH

Three frame lengths independent from the seat width.
Adjustable frame length and seat depth.

FOOTPLATE ADJUSTMENT

One-piece or double footplate with wide range of adjustment.

FRONT HEIGHT ADJUSTMENT

Moving the fork support along the frame.

VARIO CARBON

YET ANOTHER STEP AHEAD

With Vario Carbon we combine the versatility of the model Exelle Vario with the lightness and charm of the carbon fiber frame.

...then design plays its part...

■ RESEARCHED DESIGN

VARIO CARBON

No one like it.

YOGA

An unique folding system
combined with an elegant
design and with great
driving characteristics

YOGA

■ C'est plus facile!

■ EXTREMELY COMPACT

UNIQUE FOLDING SYSTEM

with the sole movement of the backrest,
the wheelchair folds and unfolds

OUTSTANDING MANEUVRABILITY

thanks to the double horizontal crossbar fixed just under the seat.

TEKNA ADVANCE

Clean design, compact, easy to adjust, great driving characteristics for a folding wheelchair with a reduced dimension crossbar hidden under the seat.

Backrests angle
adjustment

Sliding system
for front height
adjustment.

Two frame
angles and two
frame lengths.

Easy rear height and setting adjustment

ADJUSTMENTS

Fork support and fork
with integrated bearings.

The excellent driving characteristics of the original model combined with the convenience of the swing in and out and removable footplates.

TEKNA ADVANCE

with swing-away footplates

Three front frame angles.

Detail of rear wheel plate

EGO

When design
meets technology,
the result
is a masterpiece

EGO:
the rigid
wheelchair
that folds.

e.90

SYNCHRO MOTION FOLDING SYSTEM

the front and rear axles of the wheelchair fold/unfold with parallel and synchronised movement.

FOLDING BACKREST

extremely compact when you fold the independent backrest

■ TOTALMENTE REGOLABILE

EGO CUSTOM

e.go
CUSTOM

■ The heart of the Ego with a body of a made-to-measure frame.

CUSTOMISED FRAME

Enhancement of the outstanding characteristics of the Ego. It keeps backrest and footplate adjustments.

EXTREMELY COMPACT

EGO CARBON

■ One more choice for the Ego series...and what a choice!

ULTRA LIGHT ALUMINIUM WHEELCHAIRS WITH RIGID FRAME

JOKER

JOKER R2

JOKER ENERGY

JOKER JUNIOR 2.0

■ Outstanding features

JOKER

A very successful
rigid frame
wheelchair that
never stops
amazing.

Linear and
aggressive, joker
uses innovative
technical solutions.

CRASH TEST

APPROVED

STANDARD ISO 7176-19

PURE DESIGN

REAR HEIGHT

Easy and intuitive adjustments through holes.

POINT OF BALANCE

Easy and intuitive sliding system adjustment: the frame slides through the lateral plate; no need to adjust brakes and side guards.

■ Front height adjustment
with sliding system.

■ Fork support and fork
with integrated bearings.

BACKREST

20° angle adjustment.

Height adjustment.

FOLDING BACKREST

Double lock.
(it locks when folded, too).

94° ⇄ 74°

FULL CARBON SIDE PLATE

Another step ahead

JOKER WITH FULL CARBON SIDE PLATE

Researched design.

700 gr. weight reduction.

Same adjustments of the alu side plate.

Frame configuration

JOKER

The 7° taper frame identifies this model in its original configuration.

JOKER ZERO

With parallel frames, it allows for flip-up footplates (split or one-piece).

Joker R2 marks out for its extreme lightness and even cleaner design.

Front frame adduction for a better lower limbs support.

JOKER R2

■ WHAT A CHARM!

The innovative fork support, manufactured with hydroforming technology and welded to the frame offers a harmonious, distinctive design.

Carbon fiber side guards provided as standard.

Sliding rear height and point of balance adjustment.

JOKER ENERGY

Made-to-measure fully welded aluminum frame a blend of fine design and outstanding characteristics.

WELDED FRAME

Individually made

UNIQUE

each frame is
individually designed
for a single user.

**CONFIGURATION
WITH
ADJUSTABLE
FOOTPLATE**

■ **WELDED BACKREST ON DEMAND**

■ Learn to know your limits, then exceed them.

A new project, a rigid frame thought and manufactured to meet the kid's needs such as lightness, adaptability and personalisation.

JOKER JUNIOR 2.0

Each detail is
designed to enable
the child to express
his/her dynamism
at best.

Strong and very stable
footplate that can safely
be used as a step to
move to the seat.

Abducted
frame for
an optimum
posture.

■ FLIP-BACK FOOTPLATE

Ample adjustment in height,
inclination and depth ■

Adjustments

Seat depth, seat height, setting, backrest height, backrest angle.

ULTRA LIGHT CARBON FIBRE WHEELCHAIRS WITH RIGID FRAME

JOKER CARBON

CARBOMAX

DUKE

NOIR 2.0

■ Off the beaten track

JOKER CARBON

The model JOKER enhances its outstanding qualities with a carbon fiber frame that integrates the fork support.

Integrated the fork support.

Fork with integrated bearings.

Configuration with
aluminum side plate

Configuration with Full
Carbon side plate

■ Full Carbon and fully adjustable.

DUKE

DUKE

Carbon
MONOCOQUE

Duke: a wheelchair made up of two frames in carbon-fibre monocoque with differentiated section shapes to confer resistance and reactivity.

Design and characteristics of a made-to-measure wheelchair while keeping the possibility of final adjustment.

■ The wheelchair nobility

■ Two faces of the same carbon fiber gem.

Guided rear
height adjustment.

DUKE

CARBOMAX

Stemmed from the research on the use of advanced materials, CARBOmax is the extreme synthesis of the current PROGEO studies.

Made of a full carbon fibre frame, it adopts the latest technologies in each detail.

carbo **MAX**

Design, lightness
and rigidity at
the highest level
for a fully
adjustable model.

carbo **MAX**

■ INFINITE EMOTION

NOIR 2.0

The only made-to-measure carbon fibre wheelchair, renews itself in its lines and shapes improving its look and performance.

For those
who dares.

Each detail is accurately designed to accomplish an astonishing eye-catching and linear look as well as minimum weight, maximum resistance and unique manoeuvrability and dynamism.

The wheelchair, which is moulded around You, becomes the integral part of Your style and of Your own charm.

■ NOIR 2.0: the uttermost excellence.

INDIVIDUAL

each frame is individually designed and masterfully created for a single user.

■ Enjoy your living, enjoy your NOIR.

TITLING WHEELCHAIRS

TEKNA TILT 2.0

EASY TILT

■ When posture meets design

TEKNA TILT 2.0

Particular lightness and reducibility in combination with a highly reliable tilt-in-space system. This wheelchair highlights peculiarities that are hard to find in this section of product.

■ Tilt-in-space from 0° to 45° in $7,5^{\circ}$ steps.

Available in sizes for
children and adults.

Height adjustable
push handlebar.

Seat depth
adjustable.

Adjustable seat
height.

12", 16", 22"
and 24" rear
wheels

Several frame
colours

Removable
armrests

Swing-away
footplates

Rear wheels
with drum
brake

■ Personalisation

Easy to use and
easy to adjust
elevating leg rest.

■ Reclining backrest

Folding frame

Extremely
compact.

Può essere caricata anche in
un'auto di piccole dimensioni.

EASY TILT

This model combines the tilt-in-space function with a very strong, reliable and light rigid frame.

45°

-5°

Stepless tilt-in-space
from -5° (tilted forward) to 45°.

■ Reclining (and folding) backrest as standard

CONFIGURATIONS

	36	33 ⇔ 36	40			

Measures in centimeters.

The innovative hardware system facilitates its assembly and makes it suitable to nearly all kinds of wheelchair.

Its quick and easy fitting and removing system is unbeatable.

Thanks to its wide range of shells and their possible transformation, you can ensure the best support and comfort to the user.

Small or large pad for deep contour configuration (15 cm).

Swing away lateral with multiple adjustments.

Multi-adjustable headrest.

Swing-away hardware with one adjustment ball.

Swing-away hardware with extension and two adjustment balls.

Headrest adjustable in height, depth and orientation.

ADJUSTMENTS

44 mm in depth

36° in angle

Wide height adjustment
through sliding the
clamps along the tubes
and sliding the shell
on the brackets.

Suitable to most
wheelchairs in the market

AIR
physio

Fix Physio AIR for a lighter and more exclusive look
of your Progeo's rigid frame wheelchair.

It still allows for adjustment in height, 10 mm depth and 20° inclination.

Thank you!
